Name: mouse ES cell line: **PRX-129/X1 #1 p.11**

Date Received: 8/4/07

Principle Investigator: Robin Wesselschmidt

Address: Primogenix
1640 Marengo Street, Suite 702
Los Angeles, CA 90033

Karyotype: 40,XY

Result:

Chromosomes from mouse ES cell line 129/X1 p11 were analyzed using GTW banding method.

Of 20 cells examined, 19 had a normal male karyotype. One cell had an extra copy of chromosome 5 and an extra copy of chromosome 8, but was otherwise normal.

Impression: Normal male karyotype.
